

Avaya IP Office IP500 Analog Trunk 16 (Comcode 700449473)

Provides an additional 16 analog ports for connection of analog trunks

Supports both loop-start and ground-start trunks

Use with ground trunks requires that the trunk module and the IP Office control unit are grounded

The first two trunks on the module are automatically switched to power fail sockets on the rear of the unit in the event of

power interruption (must be loop start)

System must have professional upgrade
